

# Just Shape

Joshua Kwok      IXD 617

# Statement of Intent

Shapes have been an important element of our life since we are a child. We use shapes to train their minds and improve their distinguishing abilities, as well as study shapes for design and constructive decisions. Nowadays, we can find shapes that appear and utilize in different various ways, but not many people are aware of their usage and purposes.

The basic concept of the App is simple, tracking different geometric shapes that have been seen around us, where people can view how those shapes are used in different ways and notice the importance of shapes once again.
